## SUMMARY OF QUALIFICATIONS

Enthusiastic professional experienced in web technologies with a keen interest in developing responsive applications that provide practical and pragmatic solutions with speed and efficiency. Known as self-motivated and proactive, focused on effectively completing projects. Demonstrated success quickly adapting to any project, task or goal.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Ruby, HTML/CSS, AHK, Python

**Frameworks:** jQuery, ES6, React, React Native, Redux

**Databases:** MySQL, PostgreSQL, MongoDB, Cloudinary, Firebase

**Tools/IDEs:** Visual Studio, IntelliJ, Android Studio, Visual Studio Code, Postico, Xcode, Git-Fork

## TECHNICAL PROJECTS

**Pokeiron** - [Github\(FE\)](#) | [Github\(BE\)](#) | [Demo](#)

Developed a Pokemon themed game featuring large map player traversal while allowing players to collect items and catch Pokemon and utilize leaderboard statistics for player comparison. Built using vanilla JS, HTML, and a CSS frontend, with a Rails API backend using a PostgreSQL database.

- Utilized an API to retrieve and display data of pokemon.
- Designed a custom weight system to calculate the users score.
- Created a custom map with boundary lines.

**Viaggiamo** - [Github\(FE\)](#) | [Github\(BE\)](#) | [Demo](#)

Built a translation app for quickly translating and saving messages while traveling. Developed with a React frontend to be mobile friendly, with a Rails API backend using a PostgreSQL database.

- Used Google translate to create a translation guessing game.
- Hard seeded language lessons to help teach basic language translation.
- Utilized the MDN Web Speech API to record and translate the users voice.

**Sellular** - [Github\(FE\)](#) | [Github\(BE\)](#) | [Demo](#)

Developed a mobile app to easily sell items by taking pictures. Sellular allows the user to browse other's items and message them using real-time chatting. The app was built with a React Native frontend; originally using Google Firebase and transferred to a Rails API backend using a PostgreSQL database.

- Used fetch requests to create a real-time chatting experience.
- Configured Active Record and Active Storage to store and retrieve multiple photos for each user.
- Leveraged Redux to have a better control over state across the entire app.

## EXPERIENCE

### **AGE Construction** *Middletown, N.J.*

Construction Worker 11/2016 - 03/2020

- Coordinated all facets of construction work.
- Developed and monitored project schedules.
